PROFESSIONAL SUMMARY

Frontend Developer with about 3 years of experience building scalable, high-performance web applications. Proficient in React.js, Next.js, and TypeScript, with expertise in state management, performance optimization, and seamless API integration. Proven ability to enhance UX and accessibility, drive user engagement, and implement efficient frontend architectures.

SKILLS

Frontend Development: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend Development: Node.js, Express, Nest.js, MongoDB and PostgreSQL

State Management: Redux, Redux Toolkit, Context API, React-Query

API Integration: REST APIs, Postman

Testing & Performance: React Testing Library, Lighthouse, Web Vitals

Version Control & CI/CD: Git, GitHub Actions

WORK EXPERIENCE

Devlogic Software Ltd.,

Nairobi, Kenya

Frontend Developer, full-time

Sep 2023 - Jan 2025

- Spearheaded the development of a high-traffic online betting platform using React.js, Next.js, and TypeScript, driving a 15 percent increase in user registrations beyond initial projections.
- Optimized platform performance and accessibility using Lighthouse and Web Vitals, raising Lighthouse scores by 25 percent and decreasing page load time, improving UX for 100K+ daily users.
- Developed a feature-rich admin dashboard, automating user and transaction management, saving over 75 hours/month previously spent on manual processes.
- Engineered a comprehensive suite of unit and integration tests using Jest and Cypress, enhancing code reliability and reducing bug reports by 35% within the platform.
- Implemented server-side rendering (SSR) using Next.js, which decreased the first contentful paint (FCP) by 2 seconds, improving user engagement and SEO rankings for the betting platform.
- Established automated CI/CD pipelines with GitHub Actions, cutting down deployment times by 50% and enabling faster iteration on features for the high-traffic betting platform.
- Integrated real-time data visualizations for user activity and betting trends via backend APIs integrations, boosting user engagement by 30 percent through actionable insights on activity and betting trends.
- Implemented a modular UI architecture using component-based design, improving code reusability and reducing feature development time by 40 percent, accelerating project timelines.

Tech Stack: React.js, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, Rechart.

Kenya Tea Packers Limited,

Kericho, Kenya

Junior Frontend Developer,

Jul 2022 - Jul 2023

- Collaborated with senior developers to implement features for a mobile e-commerce app, increasing sales by 25% through improved user experience and API integration.
- Created user documentation and technical specifications, which reduced production errors by 15%, improving communication across development teams and stakeholders like tea farmers.
- Led RESTful API integrations for payment processing and inventory management, streamlining the purchasing process and contributing to a 20% increase in completed transactions.

EDUCATION

University of Eastern Africa, Baraton,
Major: Bachelor of Science in Software Engineering

Eldoret, Kenya
Aug 2019 - Aug 2023

PROFESSIONAL CERTIFICATIONS

Software Engineering Program, ALX Africa Feb 2023 - Jun 2024

Completed over 1500+ hours of software engineering training, mastering algorithms, data structures, full-stack development, and test-driven methodologies. Gained proficiency in programming languages such as C, Python, and JavaScript, and frameworks like React and Next.js, while enhancing remote collaboration skills through pair programming and Git flow.

React.js and Next.js Development, Udemy Oct 2022 - Jan 2023

Gained expertise in React.js and Next.js, focusing on hooks, state management, design patterns, server-side rendering, and styling with tools like Tailwind CSS and CSS modules.

JavaScript Course, Udemy Dec 2021 - Mar 2022

Gained proficiency in ES6+ JavaScript concepts, object-oriented programming, and asynchronous programming, with hands-on experience in modern development tools like NPM and Babel.

PERSONAL TECHNICAL PROJECTS

Cabin Management System (Hotel Booking & Admin Dashboard)

Built a full-stack hotel booking and admin system with dual interfaces. The admin dashboard managed cabins, bookings, and guest profiles, while the customer site allowed guests to browse, filter, and reserve cabins. Demonstrated proficiency in full-stack development and advanced React design patterns, including compound components and UI reusability.

Technologies: React.js, Next.js, Supabase, Styled Components, React Query, NextAuth and Tailwind CSS

Eventz: Events Website

Developed a responsive event platform enabling users to explore, and filter events by name, type, date, and location. Integrated seat booking, countdown timers, and event detail pages with organizer's information. Strengthened UI development skills, responsive design and filtering logic that mirrors real-world booking workflows.

Technologies: Next.js, TypeScript, React.js, Context API, React Query, Tailwind CSS, ShadCN

FitPhysique - Gym Website

Created a modern, responsive gym website to showcase services, trainers, pricing plans, and testimonials. Implemented smooth scrolling, animations, and strong visuals to enhance UX, focusing on responsive design and engaging UI components.

Technologies: Typescript, React, Next.js, Tailwind CSS, Framer Motion
